

LANG & HEYNE DRESDEN

MANUFAKTUR FÜR FEINE UHREN

Novelty 2019

Elegance, confidence, mysticism – all attributes associated with when it comes to the color black. It stands for determination, magic and even dignity. It is therefore only logical that black will be the face of the new GEORG. This model by Lang & Heyne is known for the same attributes as the color black and has given the watch's square shape a revival in the watch industry.

Our GEORG emanated with an enamel dial in silky aesthetics. From this year one, a galvanic black silver dial adorns the new GEORG in two variations: the radiant, with the intensity of the red rhombs, and the yearning, with the coolness of the blue rhombs.

Framed in an elegant square case, the timepiece elaborates every wrist and enhances its clear and reserved appearance with its matt surface.

The model with blue rhombs is given a special feature by our watchmakers: the polished lancet hands come with blued hand collets. Paired with the blue rhombs they form a fascinating arc of color. Once again, our watchmakers show their courage to go beyond the unimaginable.

The GEORG by Lang & Heyne with the new galvanic black dial is available for two models: in a 18ct rose gold case with L&H lancet hands in rose gold and red rhombs, or in a 960 platinum case with polished steel hands, blued hand collets and blue rhombs. The curved case shape with a dimension of 40 mm x 32 mm and the lugs directed downwards ensure a comfortable fit on every wrist.
